

AP4C Training and Simulation Kit

M2852 E00 000

**Training and Simulation Kit
with control panel radio
connected with AP4C**

Simulation mode

A trainer has the possibility to send from its control panel fake electronic alarms to a network of up to 8 trainees equipped with AP2C or AP4C, to familiarize the trainees with both the alarms of the detectors and a CBRN situation.

Trainees in a range of 300m will receive alarms on their detector and the trainer will have on its control panel a display of all the trainees displays.

Remote control mode

The system has also the capacity to be used as a remote alarm device and display the real concentrations measured by the detectors (up to 8 devices).

Constitution of the Kit:

- Control Panel (transmitter)
- 4 Receiver modules (receivers)
- Rechargeable batteries for each receiver + 1 charger
- 1 Control panel charger
- User Manual
- Transport Case
